

PHAM DUC DUY

BUSINESS ANALYST

Phone: 0902711422
Email: lynki1509@gmail.com
Location: Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Final-year Information Technology student with hands-on Business Analyst internship experience at TMA Solutions. Experienced in requirements analysis, functional documentation, User Stories, Acceptance Criteria, business/user/system flow modelling, wireframing, and UAT support. Able to translate business needs into clear functional requirements and collaborate effectively across Product, Development, UI/UX, and QA teams. In the short term, seeking to strengthen my Business Analysis and software product delivery capabilities; in the long term, aiming to develop into an IT Business Analyst capable of bridging business needs, users, and technology solutions.

PROFESSIONAL EXPERIENCE

TMA SOLUTIONS BUSINESS ANALYST INTERN	03/2026 - 08/2026
- Collaborated with Product Managers, Business Analysts, Developers, UI/UX Designers, and QA Engineers to analyse and clarify product requirements, translating them into User Stories, Acceptance Criteria, Business Rules, workflows, and expected system behaviour. - Modelled an anonymised cross-system Homecare user flow covering authentication, service subscription, asynchronous processing, system hand-offs, decision points, exception paths, and recovery scenarios. - Consolidated requirements from multiple product documents, epics, and related tickets into structured feature catalogues with defined scope boundaries, standardised terminology, functional grouping, and traceability for downstream User Stories and Test Cases. - Analysed integration and data-flow scenarios to identify system dependencies, permission states, synchronisation constraints, workflow gaps, and edge cases across connected components. - Supported functional testing and UAT by reviewing delivered features against documented requirements, reporting discrepancies, clarifying expected behaviour, and verifying fixes.	

SELECTED PROJECT

Online Food Delivery System	09/2025 - 12/2025
- Analysed end-to-end business and system requirements for four user groups—Customers, Restaurants, Shippers, and Administrators—covering product discovery, cart and checkout, payment, restaurant order handling, delivery tracking, and operational monitoring. - Modelled the complete order lifecycle and cross-role interactions, defining role-specific actions, workflow states, validation rules, business rules, and expected system responses from order creation through fulfilment and completion. - Translated requirements into User Stories, Use Cases, Acceptance Criteria, process flows, user flows, wireframes, and UML diagrams to create a structured functional specification for requirement validation and system design. - Analysed dependencies between customer ordering, restaurant processing, shipper delivery, payment, notifications, and administrative monitoring to identify exception scenarios and clarify system behaviour across role boundaries.	

TECHNICAL SKILLS

Business Analysis & Documentation: Requirements Elicitation & Analysis, Requirement Clarification, Gap Analysis, BRD/SRS, Functional Specification, User Stories, Use Cases, Acceptance Criteria, Business Rules
Process & System Modelling: AS-IS/TO-BE, Business Flow, Process Flow, User Flow, System Flow, UML, BPMN Fundamentals, Activity Diagram, Sequence Diagram, ERD, Wireframing
Testing & Validation: Functional Testing, UAT Support, Test Scenarios, Test Cases, Requirement Validation, Bug/Discrepancy Reporting, Retesting, Fix Verification
Tools & Technical Foundation: Microsoft Word, Excel, PowerPoint, Figma, Draw.io, Lucidchart, Balsamiq, SQL Basics
Methodologies & Collaboration: SDLC, Agile/Scrum, Cross-functional Collaboration, Stakeholder Communication, Logical Thinking, Attention to Detail
Key Artefacts: User Stories, Use Cases, Acceptance Criteria, Business Rules, Process/User Flows, Wireframes, and UML Diagrams.

EDUCATION

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY BACHELOR OF ENGINEERING IN INFORMATION TECHNOLOGY	2022 - 2026
- GPA 3.4/4.0. - Distinction Student Award (Academic Years 2022-2023 & 2023-2024).
